

## 82. Remove Duplicates from Sorted List II

Given the `head` of a sorted linked list, delete all nodes that have duplicate numbers, leaving only distinct numbers from the original list. Return the linked list **sorted** as well.

### Example 1:

**Input:** head = [1,2,3,3,4,4,5]

**Output:** [1,2,5]

### Example 2:

**Input:** head = [1,1,1,2,3]

**Output:** [2,3]

### Constraints:

- The number of nodes in the list is in the range `[0, 300]`.
- `-100 <= Node.val <= 100`
- The list is guaranteed to be **sorted** in ascending order.
